

# Facundo Pellicer Full Stack Developer

## Skills

Frontend, knowledge in **React**, **Nextjs**, **Astro**, **Javascript**, **Typescript**.

Backend, knowledge in **Node**, **Express**, **Nestjs**, **Prisma**, **PostgreSQL**, **Firestore**.

Other technologies I work with are **Git**, **Github**, **Vercel**, **Google Cloud**, **Cloudflare**.

## Experience

**Fidooo Engineering | Full Stack developer | remote | 2023 - present**

- Actively participated in the development of the company's main product, a business client conversation management system integrated with **WhatsApp API CLOUD**.
- Implemented a scalable API using **NestJS**, focusing on system performance and response time optimization.
- Developed a responsive frontend using **Next.js (React)**, enhancing overall user experience.
- Improved the development process by adopting best practices for code reviews and Pull Requests (**Github**), contributing to reduced bug rates.
- Enhanced code quality through improved readability and performance, while strengthening research and documentation skills.
- Gained experience in CI/CD pipelines using **Google Cloud** services, contributing to more efficient deployment processes and increased release frequency.
- Promoted to Team Leader in April 2024, because of my project expertise, proactive attitude, and commitment to continuous improvement.

**Guanaco Rental | Full Stack developer | remote | 2022 - 2023**

- Developed a comprehensive web application for [Guanaco Rental](#), streamlining film and photography equipment rental processes.
- Leveraged **Next.js** and **Prisma** to create a robust and scalable codebase, enhancing application performance and maintainability.
- Implemented **Gmail API** integration for automated customer communication, improving operational efficiency and reducing manual workload.
- Configured and deployed the application on a VPS using **Linux** and **Nginx**, optimizing website performance and enhancing security measures.
- Collaborated closely with the client to ensure the application met specific business needs and user requirements.

**Eventys | Frontend developer | remote | 2023 (6 months)**

- Enhanced the user interface and functionality of an events industry marketplace website.
- Implemented vendor onboarding process using **Dokan** and **WooCommerce** integrations.
- Collaborated with the team to identify and resolve bugs, improving site stability.
- Technologies: **PHP**, **WordPress**, **WooCommerce**, **Dokan**, **Elementor**, **HTML5**, **CSS**.

## Education

Industrial Design, Universidad Nacional de San Juan | 3 years | 2017 - 2020

English Institute, Colegio Integral San Juan | 2015
